RISK ASSESSMENT OF WORK WITH BIOLOGICAL AGENTS

Please note the following before completing this form:

- University Health and Safety Policy requires that risk assessment of all work with biological agents (BAs) must be carried out in advance of work commencing. A key requirement of The Control of Substances Hazardous to Health Regulations (COSHH) is to assess the risks associated with any work activity involving the use of biological materials may contain biological agents.
- YOU SHOULD COMPLETE ALL OF PART A, THE APPROPRIATE SECTIONS OF PART B, AND ALL OF PART C. WHERE HAZARD GROUP 2 BIOLOGICAL MATERIAL IS INTENDED TO BE USED THE RISK ASSESSMENT MUST BE REVIEWED BY THE DEPT/SCHOOL BIOLOGICAL SAFETY ADVISOR AND EXPLICIT APPROVAL IS ALSO REQUIRED FROM THE UNIVERSITY BIOLOGICAL SAFETY OFFICER. THIS FORM SHOULD BE SUBMITTED TO THE HEALTH, SAFETY & ENVIRONMENT UNIT FOR REVIEW VIA YOUR DEPARTMENTAL BIOLOGICAL SAFETY ADVISOR.
- It is the responsibility of the Principal Investigator/Supervisor to ensure compliance to these requirements and that this risk assessment remains valid.
- This risk assessment form **IS NOT** for assessing the risks associated with **Genetically Modified Organism activities**.

Date Submitted:	07/05/15	Date Approved:	7 May 2015
Version Number:	1.0	Supersedes (insert version number if applicable)	—

PART A: Please provide the following general information:

School/Department			
School of Automotive, Aeronautical, Chemical and Materials Engineering			
Title of Project			
Viability of Human Keratinocytes and Corneal Epithelial cells			
Project Reference Number:			
Person responsible for this work (Principle Investigator)			
Name:	Dr Qasim Rafiq	Position:	Lecturer (Aston University), Visiting Research Fellow (Loughborough)
Department:	Chemical Engineering	University School:	AACME
Person conducting this assessment			
Name:	Dr Qasim Rafiq	Position:	Lecturer (Aston University), Visiting Research Fellow (Loughborough)

Review History: required at least once a year or immediately following any significant change to the project. Significant revisions must be detailed on a revision form. The person responsible must ensure that this RA remains valid.

Date Conducted					

Department:	Chemical Engineering	Date Risk Assessment Undertaken:	07/05/15
Proposed Project Start Date:	07/05/15	Proposed Project End Date:	07/05/15

A1 PROJECT SUMMARY

A1.1 Scientific Goals of the Project.

This provides a useful background for the reviewer and reader. It need only be brief and should provide an overview of the scientific goals.

The objective of the work is to investigate the viability of Human Epidermal Keratinocytes (HEK) and Human Corneal Epithelial Cells (HCECs) after they have been exposed to UV wavelengths.

A1.2 Description of the Experimental Procedures

Describe laboratory procedures to be used and highlight any non-standard laboratory operations. This may need cross reference to supporting documentation i.e. protocols.

The UV exposure is performed at Aston in a Biological Safety Cabinet.

The HEK and HCECs will arrive at Loughborough in multi-well plates and left in a 37C incubator to equilibrate back to this temperature following transport. The cells will be passaged and cell viability determined using the Nucleocounter NC-3000. Following this, the cells will be disposed of according to the CBE waste disposal procedures.

PART B: Please provide information in one or more of the following sections, as appropriate. Only sections which you complete should be submitted:

*Section 1: micro-organisms (prions, viruses, bacteria, fungi, parasites in ACDP category 2 and pathogens controlled by the Department for the Environment, Food and Rural Affairs).
[Work with ACDP category 3 and 4 pathogens is not currently permitted in the University.]*

Section 2: cell cultures, tissues, blood, body fluids or excreta

Section 3: plants and plant material

Section 4: animals and animal tissues

SECTION 1: MICRO-ORGANISMS

B1.1 HAZARD AND RISK IDENTIFICATION: NATURE OF MICRO-ORGANISMS

This information gives an indication of the **potential** harm that the biological material may cause

B1.1.1 List all micro-organisms to be used

Name	Strain	ADCP cat*	Source
N/R			

*see *The Approved List of Biological Agents* – available on the Health & Safety website

B1.1.2 Has any strain been genetically modified in any way?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If Yes, complete Genetically Modified Organisms (GMO) Risk Assessment Form	

B1.2 DESCRIPTION OF RISK TO HUMANS

B1.2.1 The disease(s) caused to humans

Describe the type and severity of effects or disease(s) on human health (including colonisation, infection, allergy, toxin-mediated disease) by each of the agents or strains to be used

Indicate in the adjacent box if Not Relevant (N/R)	N/R	
Name	Type	Severity

B1.2.2 What is the likelihood of infection of this material? Indicate as None, Low Risk, Medium Risk, High Risk, Known Infected

Name of agent	Risk Category	Justification for Selection

If none proceed to section B1.3

B1.2.3 Infectivity to humans

Describe ALL the route(s) of infection (relevant to the laboratory setting) and the minimum infectious dose(s) if known (e.g. percutaneous, mucocutaneous, inhalation, ingestion)

Name of agent(s)	Route(s) of infection	Minimum infectious dose

B1.2.4 Drug resistance

Is there any known or suspected drug resistance amongst the strains to be used? Identify & describe.

B1.2.5 Attenuation or increased virulence

Are the strains attenuated or do they have an increased virulence in any way?

Identify and describe:

B1.2.6 Ability to survive

In what form is the agent present e.g. spores or vegetative bacteria, and are there any issues about the agents' robustness, including any resistance to chemical disinfectants?

Identify and describe:

B1.2.7 Most hazardous procedure?

Identify and describe the most hazardous procedure(s) to be used.

B1.3 HUMANS AT INCREASED RISK OF INFECTION

B1.3.1 Are there any pre-existing medical conditions that increase the risk associated with this agents listed in section 1.1 (including immunocompromised workers, pregnant workers, breast feeding mothers, diabetic workers)?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, Occupational Health must be consulted:	

B1.4. PROPAGATION OR CONCENTRATION OF ADVENTITIOUS AGENTS

B1.4.1 Give details of the volumes and concentrations of organisms to be used

Name & Strain	Volume	Concentration

B1.5 ENVIRONMENTAL CONSIDERATIONS:

B1.5.1 Are any of the agents capable of causing disease or other harm in animals, fish or plants?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
---	-----

If yes, describe briefly here (A separate risk assessment may be required if the agent to be used poses a significant risk to the environment):

B1.5.2 Will there be any other environmental risks?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, describe briefly here (NOTE: A separate risk assessment may be required if the agent to be used poses a significant risk to the environment):

B1.6 OTHER HAZARDS

B1.6.1 Are there any other hazards associated with this work? For example, hazardous chemicals, cryogenic gases ionising radiation.

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, identify these:

If yes, have these been risk assessed and any necessary approval obtained?

B1.6.2 Are there any conditions associated with the hazards described in B1.6.1 that require special attention in Section C of this risk assessment? For example, material incompatibilities with disinfectants such as Virkon or hazardous product decomposition associated with high temperatures (ie autoclaving).

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)

N/R

If yes, provide details and ensure that appropriate control measures are addressed in Section C:

SECTION 2: CELL CULTURES, TISSUES, BLOOD, BODY FLUIDS OR EXCRETA

B2.1 HAZARD & RISK IDENTIFICATION : NATURE OF CELLS, TISSUES OR BODY FLUIDS

This information gives an indication of the **potential** harm that the biological material may cause

B2.1.1 List all cells or tissues to be used. For cells indicate if primary, continuous or finite.

Indicate in the adjacent box if Not Relevant (N/R)			
Cell or tissue type and ID	Organ Source	Species	From where will it be obtained?
Keratinocytes	Epidermis	Human	Life Technologies
Corneal Epithelial Cells	Cornea	Human	Life Technologies

B2.1.2 List all blood, body fluids or excreta to be used

Indicate in the adjacent box if Not Relevant (N/R)		
Material type	Species	From where will it be obtained?
N/R		

B2.1.3 Has any material listed in section B2.1.1 been genetically modified in any way?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)
N
If Yes, complete Genetically Modified Organisms (GMO) Risk Assessment Form

B2.1.4 Will material be screened for infectious agents? (if from a cell culture collection answer B2.1.6 instead)

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)
Y
If Yes, provide details of the types of screening and agents screened for: A certificate of analysis (CoA) has been provided by the manufacturer and the cells have been screened (and tested negative) for the following infectious agents by the following assays: DNA fluorochrome assay for detection of mycoplasma Direct culture test for detection of mycoplasma PCR detection of HIV-1 virus PCR detection of Hepatitis B virus PCR detection of Hepatitis c virus Contamination test for common bacteria, yeast and fungi (negative)

B2.1.5 Will any clinical history (if relevant) be provided with this material?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)
Y
If yes give details: Donor is a Male, 19 years old as indicated by the CoA

If yes, will a policy of rejection of samples from diseased patients be adopted? Explain N/R
If yes, how will the information be disseminated in the course of the project? Use in publications
If yes, will this information be anonymised? Yes

B2.1.6 If obtained from a cell culture collection, is safety information provided?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N
If Yes, summarise here:	

B2.1.7 Has any of the material listed in section B2.1.1 been identified in the list of cross-contaminated or misidentified cell lines, available on HPA website

(http://www.hpacultures.org.uk/media/E50/3B/Cell_Line_Cross_Contaminations_v6_0.pdf)

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N
If Yes, provide details of the route of provenance back to the originator of the cell line, together with a Certificate of Analysis; identifying the methods used to qualify the cell type.	

B2.2 RISK TO HUMANS

B2.2.1 What is the likelihood of infection of this material? Indicate as None, Low Risk, Medium Risk, High Risk, Known Infected*

Cell type and ID	Risk Category	Justification for Selection
Keratinocytes	Low Risk	Hazard Group 1 material with a CoA The cells have been cultured in a Biological Safety Cabinet by a CBE trained operator (7 years experience) for 1 passage after the arrival from the Commercial vendor.
Corneal Epithelial	Low Risk	Hazard Group 1 material with a CoA The cells have been cultured in a Biological Safety Cabinet by a CBE trained operator (7 years experience) for 1 passage after the arrival from the Commercial vendor.

If none proceed to section B2.2.4

see *The Managing the risks in laboratories and healthcare premises – available at

<http://www.hse.gov.uk/biosafety/biologagents.pdf>

B2.2.2 If low, medium or high risk (section B2.2.1), name and classify the Biological Agents this material could be infected with. List the biological agents and indicate the ACDP hazard group classification*

Name of Agent	Classification
None – due to screening outlined in the CoA and culture conducted in a Biological Safety Cabinet by a CBE operator	

--	--

*see *The Approved List of Biological Agents* – available on the Health & Safety website or <http://www.hse.gov.uk/pubns/misc208.pdf>.

B2.2.3 Describe the route(s) of infection (in humans) for these adventitious agents (place a 'X' in the relevant box)

Percutaneous	Mucocutaneous	Inhalation	Ingestion	N/R
				N/r
Details:				

B2.2.4 Are there any other biological hazards (other than adventitious infectious risk) associated with the materials e.g. aggressive tumourigenic cell lines

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If Yes, describe:	

B2.3 HUMANS AT INCREASED RISK OF INFECTION

B2.3.1 Do any of the agents listed in section 2.1 present an overt risk to humans at increased risk (including immunocompromised workers, pregnant workers, breast feeding mothers)?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, Occupational Health must be consulted:	

B2.4. PROPAGATION OR CONCENTRATION OF ADVENTITIOUS AGENTS

B2.4.1 Will any culturing of this material take place?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	Y
If yes, identify the cells and the conditions these will grow:	
The cells will be passaged once but only to determine viability, they will then be disposed of according to the CBE procedures.	

B2.4.2 If culturing, will CD4+ cells be present. Describe what cells and for how long these cultures will be allowed to grow

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, explain:	

B2.4.3 If culturing, what is the maximum volume of culture grown?

Indicate in the adjacent box if Not Relevant (N/R)		
Per Flask	Per experiment	1 x 10 ⁶ cells

B2.4.4 Will the cells be manipulated in any way that could result in a concentration of any adventitious biological agent present?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, explain:	

B2.5 WORKING WITH MATERIAL DONATED BY YOURSELF OR COLLEAGUES:

Workers **MUST NEVER** culture, deliberately transform or modify their own cells or cells from their co-workers or workers otherwise associated with the experimental work. *NOTE: This presents a particular hazard since any self-inoculation injury could have potentially serious consequences as cells would essentially circumvent the normal protection of the immune system.*

B2.5.1 Will any cells be donated by persons working in or has access to the lab?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, explain what precautions are to be taken to prevent that person being exposed to the cells:	
If yes, where will this material be collected:	
If yes, provide justification for not using a safer source:	
If yes, how will confidentiality be assured:	
If yes, has Ethics Committee approval been obtained:	

B2.6 ENVIRONMENTAL CONSIDERATIONS:

B2.6.1 Are any of the agents capable of causing disease or other harm in animals, fish or plants?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, describe:	

B2.6.2 Will there be any other environmental risks?

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, describe:	

B2.7 OTHER HAZARDS

B2.7.1 Are there any other hazards associated with this work? For example, hazardous chemicals (especially carcinogens, mutagens, substances toxic to reproduction, cytotoxins), cryogenic gases, ionising radiation.

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)	N/R
If yes, identify these:	
If yes, have these been risk assessed and any necessary approval obtained?	

B2.7.2 Are there any conditions associated with the hazards described in B2.7.1 that require special attention in Section C of this risk assessment? For example, material incompatibilities with disinfectants such as Virkon or hazardous product decomposition associated with high temperatures (ie autoclaving).

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)
--

N/R

If yes, provide details and ensure that appropriate control measures are addressed in Section C:
--

SECTION 3: PLANTS, PLANT TISSUE OR MATERIAL, PLANT PATHOGENS

B3.1 HAZARD AND RISK IDENTIFICATION: NATURE OF PLANT, PLANT TISSUE OR MATERIAL, PLANT PATHOGENS

This information gives an indication of the **potential** harm that the biological material may cause

B3.1.1 List all plant or plant tissues to be used

B3.1.2 Is any of the material listed in B3.1.1 infected with pathogen?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, also complete Section 1	

B3.1.3 Is any material listed in B3.1.1 transgenic?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If Yes, complete GM Risk Assessment Form	

B3.2 RISK TO HUMANS

B3.2.1 The disease(s) caused to humans

Describe the type and severity of effects or disease(s) on human health (including irritation, allergy, effect of toxins) by each of the materials to be used

Name of plant/plant tissue	Type	Severity

B3.2.2 What is the likelihood of infection of this material? Indicate as None, Low Risk, Medium Risk, High Risk, Known Infected

Name of plant/tissue	Risk Category	Justification for Selection
<i>If none proceed to section B3.3</i>		

B3.2.3 Describe the routes of that the effects described in section B3.2.1 are transmitted (place a 'X' in the relevant box)

Percutaneous	Mucocutaneous	Inhalation	Ingestion	N/R
				N/R
Details:				

B3.3 HUMANS AT INCREASED RISK OF INFECTION

B3.3.1 Do any of the agents listed in section 4.1 present an overt risk to humans at increased risk (including immunocompromised workers, pregnant workers, breast feeding mothers)?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, Occupational Health must be consulted:

B3.4 ENVIRONMENTAL CONSIDERATIONS:

Risk to other plants

B3.4.1 Will there be any risk other plants?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, describe:

B3.4.2 Will there be any other environmental risks?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, describe:

B3.4.3 Is the plant to be used controlled by the Department for the Environment, Food and Rural Affairs?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, approval will not be granted until a copy of the DEFRA licence has been submitted to the Biological Safety Group:

B3.5 OTHER HAZARDS

B3.5.1 Are there any other hazards associated with this work? For example, hazardous chemicals, cryogenic gases ionising radiation.

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, identify these:

If yes, have these been risk assessed and any necessary approval obtained?

B3.5.2 Are there any conditions associated with the hazards described in B3.5.1 that require special attention in Section C of this risk assessment? For example, material incompatibilities with disinfectants such as Virkon or hazardous product decomposition associated with high temperatures (ie autoclaving).

Indicate in the adjacent box as: Yes, No or Not Relevant (N/R)

N/R

If yes, provide details and ensure that appropriate control measures are addressed in Section C:

SECTION 4: ANIMALS AND ANIMAL TISSUES

B4.1 HAZARD AND RISK IDENTIFICATION: NATURE OF ANIMALS OR TISSUE

This information gives an indication of the **potential** harm that the biological material may cause

B4.1.1 List all animals or animal tissues to be used

Species	Sex	Source	Anatomical Site	Origin or geographical source

B4.1.2 Is the animal or tissue/body fluid to be worked with infected or to be infected?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If Yes, complete Section 1 of this form	

B4.1.3 Is a carcinogen, drug or other substance to be administered to the animal(s) or present in the tissue?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If Yes, complete the appropriate Chemical COSHH Assessment	

B4.1.4 Have the investigators that will be performing the work on animals obtained the appropriate Home Office Licence?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If No, consult the H&S Office.	

B4.1.5 Have Standard Operating Procedures (SOPs) for the proposed work been approved?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If No, consult the H&S Office. If Yes attach the signed approval.	

B4.2 RISK TO HUMANS

B4.2.1 The disease(s) caused to humans

Describe the type and severity of effects or disease(s) on human health (including infection, allergy, bites and scratches)

Name of animal/animal tissue	Type	Severity
------------------------------	------	----------

B4.2.2 What is the likelihood of infection of this material? INDICATE as None, Low Risk, Medium Risk, High Risk, Known Infected

Name of agent	Risk Category	Justification for Selection
<i>If none proceed to section B4.3</i>		

B4.2.3 Describe the routes of that the effects described in section B4.2.1 are transmitted (place a 'X' in the relevant box)

Percutaneous	Mucocutaneous	Inhalation	Ingestion	N/R
				N/R
Details:				

B4.3 HUMANS AT INCREASED RISK OF INFECTION

B4.3.1 Do any of the agents listed in section B4.1 present an overt risk to humans at increased risk (including immunocompromised workers, pregnant workers, breast feeding mothers, workers repeatedly handling or multiply dosing animals)?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, Occupational Health must be consulted:	

B4.4. PROPAGATION OR CONCENTRATION OF ADVENTITIOUS AGENTS

B4.4.1 Will any culturing of this material take place?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, complete Section 2 of this form:	

B4.4.2 How many animals will be used?

Indicate in the adjacent box if Not Relevant (N/R)	N/R

**B4.5 ENVIRONMENTAL CONSIDERATIONS:
Risk to other animals**

B4.5.1 Will there be any risk other animals?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, describe:	

B4.5.2 Will there be any other environmental risks?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, describe:	

PART C: CONTROL MEASURES

C1. CONTROL MEASURES

The risk of exposure must be prevented or adequately controlled to minimise the chance of harm arising. COSHH Regulations require minimum containment measures for laboratories handling organisms from the different ACDP hazard groups (<http://www.hse.gov.uk/pubns/misc208.pdf>)

The hazard group number typically indicates the level of containment (includes physical measures & working practices) that must be used for its handling).

C1.1 Preventing Exposure

C1.1.1 Substitution with a Safer Alternative

Is substitution with a safer alternative practical, by for example, replacement of a clinical strain or pathogen with one that is lab adapted? Provide reasons for your answer:

Not applicable as this is already lab adapted and has been screened by Life Technologies

C1.1.2 Isolation/Segregation

(i) Is/Are the laboratory(s) to be used for this work to be shared with other workers not directly involved in this activity?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

Y

If yes, provide details:

Using a shared biosafety cabinet

(ii) Is access to the laboratory(s) to be used for this work restricted?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N

If yes, provide details:

C1.2 Controlling Exposure

C1.2.1 Are sharps (needles, blades, scissors, forceps, glass or capillary tubes) to be used at any stage during this activity?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N

If yes, list the sharps:

If yes, justify there use – is there an alternative?

If yes, describe there use and disposal:

If yes, describe any additional precautions employed to reduce risk:

C1.2.2 Containment and Ventilation

(i) Is the use of BSC required for the protection of the worker i.e. do the work procedures generate aerosols or splashes that pose a risk to workers?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N
If yes, specify the type(s) and when they will be used:	
<i>(ii) Are there any requirements for room ventilation e.g. negative pressure, temperature control?</i>	
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N
If yes, specify:	

C1.2.3 Transport and Storage within the laboratory

<i>How and where are materials to be stored?</i>
<i>Upon arrival, the materials will be placed in a 37C incubator for 1 hour and then cultured</i>
<i>How will this material be transported within the laboratory e.g. between BSC and incubator? Detail the containment measures which will be used to prevent or contain accidental splashes or spills.</i>
<i>The cells will be kept in tissue culture plates and not exposed during transit from BSC to the incubator.</i>

C1.2.4 Local transport out of the laboratory

<i>How will this material be transported on-site (e.g. research material between labs on campus or movement of waste containing viable agents e.g. to a remote autoclave)? Detail the containment measures which will be used to prevent or contain accidental splashes or spills</i>
N/A

C1.2.5 Shipment of Biological Material

<i>Will this material be shipped elsewhere in the UK or abroad?</i>	N		
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)			
If yes, give details to support compliance to the relevant regulation (e.g. category of material, correct packaging instruction):			
Description of material to be shipped (<i>indicate in available boxes</i>). Is this:			
Category A	UN2814	UN2900	Packaging instruction 602 or 620 must be followed
Or?			
Category B	UN3373		Packaging instruction 650 must be followed
Or?			
Non-hazardous			Should be packaged to protect sample

C1.2.6 Receipt of material

<i>If material will be received from other sites or organisations, what precautions are being taken to ensure that the material is shipped correctly?</i>
<i>The tissue culture plates have been sealed and placed in an appropriate secondary storage container.</i>

C1.2.7 Centrifugation

<i>(i) If material is to be centrifuged will sealed buckets and rotors be used?</i>	Y
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	

(ii) Where will these rotors/buckets be opened?

In the biosafety cabinet

(iii) Describe the procedures in place to deal with leaks and spillages in the centrifuge

Any leaks and spillages will be tended to as described in SOP038 Biological Spill Response

C1.2.8 Incubators

If incubators are to be used, what type of incubator (e.g. shaking, static) is used and describe procedures to prevent and contain spillages.

A static incubator will be used and the plates will be sealed whilst in the incubator

C1.2.9 Disinfection

Specify the type and concentration of disinfectants to be used:
Virkon

Have these disinfectants been validated for use with the recipient biological material?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

Y

If yes, describe the procedure:

The biological material will be disposed of as indicated in SOP003 Disposal of Biological Waste

C1.2.10 Personal Protective Equipment (PPE)

(i) What type of lab coats will be worn and where will they be stored?
The CBE lab coats will be worn and stored in the first change room

(ii) What type of gloves will be worn and where will they be stored?
The CBE gloves will be worn and stored in the first change room

(iii) Describe any other PPE to be used:
N/R

C1.2.11 Hygiene Measures

Describe the hygiene facilities available and where they are located

Hygiene measures are located in the CBE first change room and in each laboratory.

C1.2.12 Vaccination

Are effective vaccines available against any of the agents listed in Section 1, 2, 3, or 4 of Part B?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If yes, describe:

C1.2.13 Waste Treatment before Disposal

How must waste to be treated before disposal and how has it been validated as being effective?		
Type of Waste	Treatment before disposal	Validation of this treatment
Liquid waste	Virkon Treatment	CBE current procedure
Solid waste	Material isolated in autoclave bags and then autoclaved	CBE current procedure

C1.2.14 Autoclave sterilisation

If waste is treated by autoclave sterilisation then this section must be completed. If this section is not relevant then hatch the box			
Type of Waste	Composition of waste	Autoclave cycle (temp, cycle time)	Treatment monitor
Liquid waste			
Solid waste	Flasks, Pipettes	Cycle 4	Confirmation of cycle completion and markings on autoclave tape
Location of autoclave	Servicing details	Location of back-up autoclave	Designated area for storage of unsterilised waste

C1.2.15 Liquid Waste Disposal

How will liquid waste be disposed of?
To the drain? Following treatment with virkon for 24h, down the drain
As solid waste?
Other?

C1.2.16 Solid Waste Disposal

Describe the waste category and disposal route. (For guidance refer to <http://www.environment-agency.gov.uk>)

Colour Code	Categorisation	Hatch relevant box(es)	Disposal Method
Yellow	Sharps (not contaminated with cytotoxic/cytostatic material)	X	Yellow Sharps bin>autoclave sterilisation if known or potentially infected >clinical waste disposal (incineration)
Purple/Yellow Special case, contact DSO	Sharps (contaminated with cytotoxic/cytostatic material)		Purple/Yellow lidded Sharps bin>clinical waste disposal (incineration @ 1000C)

Yellow	Human body parts, organs, including blood bags and blood preserves and excreta (unless identified as medium or high risk or known infected in Section 2.2.1 of this RA in which case they must be pre-treated before disposal)		Yellow rigid one way sealed tissue bins>clinical waste disposal (incineration)
Yellow	Animal body carcasses or recognisable parts ((unless identified as medium or high risk or known infected in Section 2.2.1 of this RA in which case they must be pre-treated before disposal		Yellow rigid one way sealed tissue bins > clinical waste disposal (incineration)
Special Case – Contact DSO	Potentially or known infected lab wastes (including sharps) of HG2, GM Class 2, DEFRA Cat 2 or higher, that have not been pre-treated before leaving the site.		This is not a route of preference and is subject to special requirements
Orange	Infected or potentially infected lab wastes that have been pre treated before leaving the site	X	Disinfection or sterilisation (as identified in C1.2.14) in the laboratory suite > orange clinical waste bags > clinical waste disposal (incineration)
Yellow	Infected or potentially infected animal or human body parts, organs or excreta that have been pre treated before leaving site	X	Disinfection or sterilisation (as identified in C1.2.14) in the laboratory suite > yellow one way sealed tissue bins > clinical waste disposal (incineration)

C1.2.17 Work with Animals or Vectors (if none proceed to Section C1.2.18)

(i) Are animals or vectors to be infected with any of these biological agents?	
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, describe the procedure and describe where this aspect of the work will be conducted:	
(ii) Is shedding of infectious materials by the infected animals possible or expected?	
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
If yes, describe the routes of shedding, risk periods for such shedding and the additional precautions required to control exposure:	
(iii) Who will perform the inoculations of animals/vectors? What training have they received?	
Indicate in the adjacent box if Not Relevant (N/R)	N/R
Provide details of the training required:	

C1.2.18 Bioreactor/Fermenters (if none proceed to Section C1.2.19)

Will a bioreactor/fermenter be used to culture a biological agent?	
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/r
If yes, describe the size, and type of the bioreactor/fermenter.	
(ii) Are any supplementary containment measures required, for example, the use of a BSC or spill tray.	
Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R

If yes, describe:

C1.2.19 Other Control Measures Required?

C1.3 Emergency Procedures

C1.3.1 Describe the procedures in place for dealing with spillages (specify disinfectants and any special containment for large volumes)

Within the BSC: As described in SOP038 Biological Spill response

Within the laboratory but outside the control measure e.g. BSC, spill tray
As described in SOP038 Biological Spill response

Outside the laboratory e.g. during transport
Appropriate secondary containment and sealed flasks

Describe the procedures in place for an accidental exposure (if necessary describe different procedures for different types of exposure e.g. eye splash or percutaneous inoculation)

As described in SOP038 Biological Spill response

C2 ASSIGNMENT OF CONTAINMENT LEVEL

The laboratory Containment Level is directly related to each of the 4 Hazard Groups; organisms categorised as HG1 (lowest hazard rating) should normally be handled in CL1 facilities (minimum level of containment), and likewise up to HG4 (highest hazard rating) in CL4 facilities (maximum level of containment). Where the identity or presence of a biological agent is not known the following rules apply: a) where uncertainty exists over the presence of pathogenic biological agent – minimum of CL2; b) where the presence of a pathogenic biological agent is known or suspected – minimum of Containment Level appropriate to the agent, where the assessment is inconclusive but where the activity might involve serious risk – minimum CL3

C2.1. What containment level is required for this work? (see COSHH Schedule 3, Part II for a list of criteria)

Containment Level 1

C2.2. Describe extra controls or derogation from certain controls

N/R

C3 FACILITIES

C3.1 Where will this work take place?

Room(s)	Building	Campus	Person in Control of area
<i>H25</i>	<i>CBE</i>	<i>Loughborough</i>	<i>Dr Andy Picken</i>

C4 PERSONNEL**C4.1 Names of Personnel involved in the Project**

Surname	Initials	University ID	Position
<i>Rafiq</i>	<i>QA</i>	<i>5020332</i>	<i>Lecturer / Visiting Ferllow</i>

C4.2 Information, Instruction and Training

Describe the training that will be given to all those affected (directly or indirectly) by the work activity. Instruction should include the 'Local Rules' or 'Local Codes of Practice' which focus on the working instructions to be followed by all persons involved in the work activity to control or prevent exposure to hazardous biological agent(s). These should be written and readily available to all workers working at Containment Level 2. A formal record of training should be kept for all individuals working at Containment Level 2.

Local Rules and Codes of Practice at the CBE will be adhered to.

C4.3 Relevant Experience/Training:

Surname	Experience/Training
<i>Rafiq</i>	<i>8 years cell culture training, 6.5 years of which has been in the CBE</i>

C4.4 Other people who may be at risk from the activity e.g. cleaners, maintenance workers or other workers in shared laboratory

Details:

Other works may be at risk, however this will be mitigated by ensuring sufficient containment and adherence to the local procedures at the CBE

C5 OCCUPATIONAL HEALTH

C5.1 Vaccination

Is an effective vaccination available for any of the pathogens associated with this work? Advice can be obtained from the Occupational Health Adviser (OHA) if required. All workers involved with handling unscreened blood, blood products and other tissues are recommended to have Hepatitis B immunization

Yes

C5.2 Health Surveillance

Is health surveillance required? (Health surveillance is typically applied if working with a hazardous substance that: a) produces an identifiable disease or adverse health effect that can be related to exposure; b) there is a reasonable likelihood that the disease or effect may occur under the conditions of work, and c) there are valid techniques for detecting indications of the disease or effect).

N/R

C6. NOTIFICATIONS: Human Tissue Act

C6.1.1 Relevant material covered by the Human Tissue Act

Are any of the cells, tissues or fluids to be used covered by the Human Tissue Act?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

C6.1.2 Does This Work Have Ethical Approval? If Yes, Provide Details

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/r

Approval number:

Date obtained:

Ethics committee name:

C6.1.3 Are other registrations/notifications required for this work? For example HSE notification under COSHH, Home Office notification under anti-terrorism, crime and security act etc

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)

N/R

If Yes, give details:

7. LICENSING REQUIREMENTS FOR ANIMAL PRODUCTS

C7.1.1 Are there any licensing requirements for this work?

Indicate in the adjacent box as No, Yes or Not Relevant (N/R)	N/R
<p>The regulations covering the import of animal products (including tissue cultures, tissues, body fluids or fractions thereof) are in a state of flux. Current procedures to be followed:</p> <ul style="list-style-type: none"> If you wish to import any animal products that you know are not infected with an animal pathogen, or have good reason to expect that they are not infected with an animal pathogen, from within or outside of the EC you must apply for a Research Sample Licence using the Defra form IAPPO1. Follow this link to download the form http://www.defra.gov.uk/corporate/docs/forms/health/iappo1.htm If you wish to import such an animal product but it is known or suspected of being infected with an animal pathogen then you must use DEFRA form IM137. Follow this link to download the form http://www.defra.gov.uk/corporate/docs/forms/health/inttrade/im137.htm If you wish to import an animal pathogen listed under the Specified Animal Pathogens Order then you must use DEFRA form PATH1. Follow this link to download the form http://www.defra.gov.uk/corporate/docs/forms/health/path1.htm <p>In all cases the instructions for their submission is stated on the forms themselves.</p> <p>ALL APPLICATIONS SHOULD BE REVIEWED BY THE DEPARTMENTAL SAFETY OFFICER AND THE UNIVERSITY BIOLOGICAL SAFETY OFFICER BEFORE SUBMISSION.</p>	

8. DECLARATION

The declaration must be signed **before** submitting this assessment to the Departmental Safety Officer and University Biological Safety Officer

I, the undersigned:

- confirm that all information contained in this assessment is correct and up to date
- will ensure that **suitable and sufficient instruction, information and supervision** is provided for all individuals working on the activity
- will ensure that no work will be carried out until this **assessment has been completed and approved** and that all necessary control measures are in place
- that all information contained in this assessment must remain correct and up to date (the assessment should be **reviewed once a year** and whenever any **significant changes** to the work activity occur)
- will re-submit the assessment for approval if any significant changes occur

Name: Person conducting assessment	Signature:	Date:
QASIM RAFIQ	Q. Rafiq	07/05/15
Name(s): All named persons involved in the project (add additional rows below, as required)	Signature:	Date:
QASIM RAFIQ	Q. Rafiq	07/05/15

Name: Principal Investigator/Supervisor/Line Manager	Signature:	Date:
QASIM RAFIQ	Q. Rafiq	07/05/15

9. APPROVAL

For work involving **Hazard Group 1** biological agents: Review and approval is required by authorised and designated members of CBE staff before the work begins

For work with **Hazard Group 2** biological agents: Explicit approval is required from the Departmental Biological Safety Advisor and the University Biological Safety Officer before work begins.

If the biological agent has been **Genetically Modified** this form, (approved by the relevant authority, as above) should be submitted with the GMO risk assessment to the Departmental Biological Safety Advisor and both forms forwarded to the LU GM Safety Committee for final approval.

Name: Authorised CBE Personnel (please indicate position)	Signature	Date

Name: University Biological Safety Officer (or Deputy)	Signature	Date

CERTIFICATE OF ANALYSIS

PRODUCT NAME: Human Corneal Epithelial Cells (HCEC, HCEC-2)	Catalogue #: C-018-5C
--	------------------------------

Product Information

Description:	Human Corneal Epithelial Cells (HCEC), isolated from the progenitor-rich limbal region, cryopreserved at the end of 2' culture level. $\geq 500,000$ viable cells per vial. For Research Use Only.
Lot Number:	893103
Donor Age/Sex:	19/Male
Storage Conditions:	Liquid Nitrogen

Required Testing and Results

Test	Specification	Result
Viable cells per vial	$\geq 500,000$	778,000
Viability by Trypan Blue exclusion	$\geq 70\%$ viable	90%
Growth rate first culture	Check and record	1.3 pd/day
Long term growth performance	≥ 12 population doublings (pd)	15
Immunofluorescent detection of p63 α	Positive	Pass
Immunofluorescent detection of CK15	Positive	Pass
DNA fluorochrome assay for detection of mycoplasma	Not detected	Pass
Direct culture test for detection of mycoplasma	Not detected	Pass
PCR detection of HIV-1 virus	Not detected	Pass
PCR detection of Hepatitis B virus	Not detected	Pass
PCR detection of Hepatitis C virus	Not detected	Pass
Contamination: Bacteria, yeast, fungi	Not detected	Pass

Signature: 
Troy Brewster, QA Specialist

Date: 01/22/2011

The cells in this lot were derived from tissue obtained from accredited institutions. Consent was obtained by these institutions from the donor or the donor's legal next of kin, for use of the tissue and its derivatives for research purposes.

Caution: The user should treat all human cells as potential pathogens. Wear protective clothing and eyewear. Practice appropriate disposal techniques for potentially pathogenic or biohazardous materials.

For research use only. Not intended for human or animal therapeutic or diagnostic use.

CERTIFICATE OF ANALYSIS

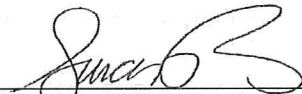

PRODUCT NAME: Human Epidermal Keratinocytes, adult (HEKa)	Catalogue #: C-005-5C
--	------------------------------

Product Information

Description:	Human Epidermal Keratinocytes, adult, cryopreserved primary culture. $\geq 500,000$ cells/vial. For Research Use Only.
Lot Number:	1677048
Donor Age/Sex/Pigmentation	45/Female/Light
Storage Conditions:	Liquid Nitrogen

Required Testing and Results

Test	Specification	Result
Viable cells per vial	$\geq 500,000$	1,04,000
Viability by Trypan Blue exclusion	$\geq 70\%$ viable	91%
Growth rate in log phase	Check and record	0.74 pd/day
Long term growth performance in EpiLife & HKGS	≥ 25 population doublings (pd)	25.8
DNA fluorochrome assay for detection of mycoplasma	Not detected	Pass
Direct culture test for detection of mycoplasma	Not detected	Pass
PCR detection of HIV-1 virus	Not detected	Pass
PCR detection of Hepatitis B virus	Not detected	Pass
PCR detection of Hepatitis C virus	Not detected	Pass
Long-term antibiotic-, antimycotic-free culture for detection of bacteria, yeast and other fungi	Not detected	Pass

Signature:  Date: 02 Apr 2015
