RISK ASSESSMENT REVIEW/REVISION RECORD

Risk Assessment Ref No:	CBE 175	Version Number

This risk assessment should be reviewed **annually** or more frequently if there is any change in the work, or if new information becomes available that indicates the assessment may no longer be valid. **This form should be attached to the front of the current version of the risk assessment or to the new version of the risk assessment if one is issued**

The following review has been carried out on the dates indicated and either the assessment remains valid or it has been amended as indicated.

Name(s) of reviewer: PRAVEENKUMAR KAVERI	Date: 14.11.2019
Signature: 	

Reason for Review:

The risk assessment review has been requested to use new bacterial strain in ELISA technique for aptamer validation. The proposed bacterial strain (Escherichia coli, NCTC 13441 and Pseudomonas aeruginosa, ATCC-15692) has been determined that, the handling, storage and disposal route is like the existing risk assessment approved strains. Further, the spill response for the requested strain resemble the similar inactivation or prevention methods of existing methods.

Revision Required (Y/N)	YES
--------------------------------	------------

If Yes, give details of the revision:

The risk assessment was approved for the usage of selected bacterial strains, and, now new bacterial strains are proposed to use in the same experiments. The handling, storage, and disposal procedure for the new strain has been noted from the SDS, which is similar to the existing approved strains.

Issue no v3.1

Issue Date 18-Dec-12

(This area is intentionally left blank for the reviewer's notes.)

Approval:

Instructions for Reviewer:

1. *The completed form should be forwarded to the CBE Quality Manager. NOTE: Significant revision (See Guidelines GN006 & GN007) will require approval by the person supervising the work and subsequent review and approval by the original approving authority. This may require a revised version of the risk assessment to be issued for re-approval.*
2. *Where an annual review concludes that the risk assessment is still valid ie no revision is required, this should be recorded, and the completed form forwarded to the CBE Quality Manager.*
